

Color Play - What is your Color Way?

How should I glaze this ? What color ? What texture ?

Color: Described by 3 characteristics : hue ,value and intensity.

Hue : The color name; Red, Blue, yellow, etc.

Value: The relative lightness or darkness of a color . (this refers to the gray scale)

Intensity : Purity and of color saturation, bright or dull.

Tint : Color + white

Tone : Color + grey

Shade : Color + Black

Primary Colors : Red, Yellow, Blue

Secondary Colors: Orange, Green , and Violet - made by mixing 2 primary colors.

Warm Colors : Reds, oranges, yellows

Cool Colors : Greens, blues and violets

Harmonious Color Schemes :

Monochromatic : using any tint,shade or tone of just one color.

Analogous: colors that are adjacent to each other on the color wheel.

Complimentary : colors directly opposite on the color wheel.

Ceramic Colors are influenced by the chemistry of the glaze and the clay body used. We use our G Mix ^6, an off-white body.

Color has more options :

Split Compliment : Using any color with 2 colors on each side of it's compliment.

Triad : Using 3 colors equally spaced from each other on the color wheel.

Tetrad : Using a combination of 4 colors on the wheel that are 2 sets of compliments .

Key Color :Predominant color in the color scheme.

Seeing these colors side by side or triads , it's easy to see when a color is dominant or recessive - helping to select it's place on your ceramic work.

This excersize in color was begun using our new glaze colors. Along the way it grew to include some of our existing glazes this is only a beginning - there is so much more to explore !
